Of course very simple implementations of the theme didn't stand a chance.

Unfortunately there were problems which had been anticipated.

**1.Tg6-b6 (2.Tb8#)!** Kd8/0-0 2.Tb8/Tg6#

Comparable with Z10. Naturally the white rook should be on g1 instead of g6 (then 1.Rg1-b1!) because of the economy of space.

Unfortunately there is a partial anticipation by Rosario Notaro, Gazeta Czestochowska 1979 (Ke6 Rg2 Bf6 – Ke8 Rh8 Sc1 Ph7).

## Award 4 TT Problemist Ukrainy - #3

*by Ingemar Lind*

**Theme:** #3 miniatures, where twins (triplets, quadruplets) are made by exchanging a piece with another piece of the same color, on the same spot.

My intention with this theme was to come up with something rather original, but still a quite free theme, not so easy to master, which allows many different kinds of compositions. These types of themes are the ones that I personally prefer.

All in all, 18 problems by the following composers entered the tourney:

Composer(s)	Country	Problems entered
Mykola Chernyavskyj	Ukraine	4
V. Chornous/M. Chernyavskyj	Ukraine/Ukraine	1
A Dashkovsky	Ukraine	1
Myron Gnatyna	Ukraine	3
Valentyn Hupchenko	Ukraine	1
Karol Mlynka	Slovakia	1
Dieter Müller	Germany	4
Rolf Uppström	Sweden	1
Eligiusz Zimmer/M. Chernyavskyj	Poland/Ukraine	1
Nikolaj Zujev	Lithuania	1

I am pleased with the overall quality of the compositions. There were few masterpieces, but still several very good problems. And I am also pleased with the number of entries (18).

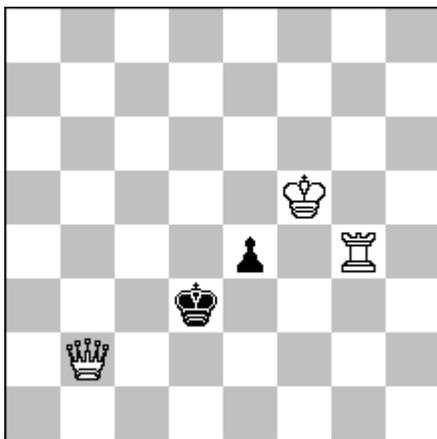

Unfortunately, though, I had to exclude two entries:

Dashkovsky, Kc3-Ka3: Nice problem, but unthematic twinning.

Gnatyna, Kf5-Kh5: Only one of the 4 twins (c) is thematic. Therefore, I recommend the author to save this problem for another tourney, as it is a very good one.

And here is the award:

**1<sup>st</sup> Prize: Nikolaj Zujev, Lithuania**

#3 b) wBg4 c) wSg4

1. Rg2! (2. Rc2 Ke3 3. Qc3 #)

1. ... Kc4 2. Rc2 + Kd3 /Kd5 3 Qc3/Qe5 # (1. Rg3+? Kc4 2. Rc3+ Kd4 3. Qd2 1... e3!)

b) 1. Ke5 Kc4 2. Be2 Kc5 3 Qb5 #

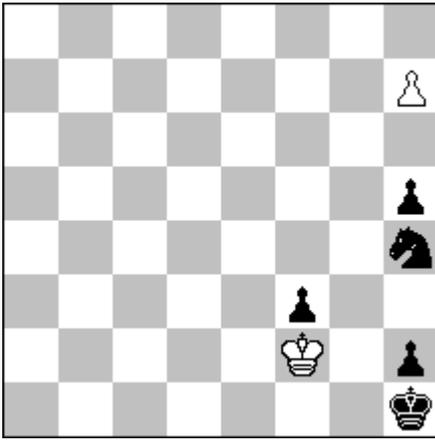

(1. Qc1? e3 2. Ke5 e2 3. Bf5 1... Kd4!)

c) 1. Se5 + Ke3 2. Kf6 Kf4 3. Qf2 #

(1. Ke6? e3 2. Se5+ Ke4 3. Qb4 1... Kc4!)

This problem was my definite favorite. Excellent economy, three very different variants, plus a good try in each variant, all with different refutations. The checking key in c) is a slight weakness, but is compensated by a nice second move, silently forcing the black king to its doom. All in all a great achievement, and a very well-deserved victory!

**2<sup>nd</sup> Prize: Mykola Chernyavskij, Ukraine**

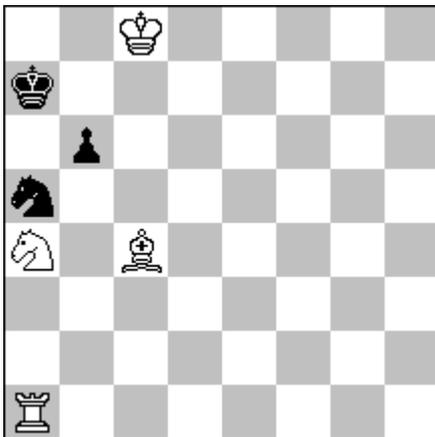

#3 b) wBh7 c) wSh7

1. h8=Q! [2. Qa1#]  
 1. ... Sg2 2. Qa1+ Se1 3. Qxe1#  
 b)  
 1. Sf6! Sf5 2. Sxh5 S- 3. Sg3#  
 c)  
 1. Be4!  
 1. ... Sg2 2. Bxf3 h4 3. Bxg2#

The individual variants are quite simple, but as a whole, it is still a very nice problem. Three quite different variants, where b) with black in repeated zugzwang is my favorite. Good use of the material, as not only Sh4, but also Ph5, play important roles in several variants. Also, minimal problems with triplets of this kind are very rare, so the problem is quite original. Very good!

**Special Prize: V. Chornous/M. Chernyavskij,  
 Ukraine/Ukraine**

#3 b) bPa5 c) wRc4

1. ... Ka8 2. Rc7 b5 3. Rxa5#

1. ... Ka6 2. Kb8 b5 3. Rc6#

1. ... b5 2. Rc6 b4 3. Rxa5#

This problem was definitely the most difficult one to judge. My intention with the theme was that **all** twins/triplets would exchange the **same** piece, and this is not the case here.

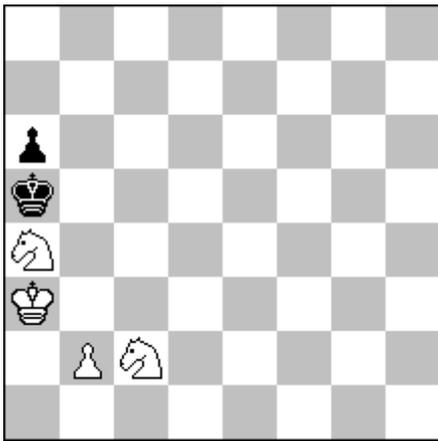

However, after looking at the theme rules again, I can see that they are perhaps not entirely clear after all, even though the examples clearly show what was intended.

Finally, I decided to award this problem a special prize, as it is definitely a great achievement.

Three entirely different settings, and a whole lot of different variants and mates in each one.

Excellent work!

### 1<sup>st</sup> HM: Myron Gnatyna, Ukraine

#3 b) wBb2 c) wRb2

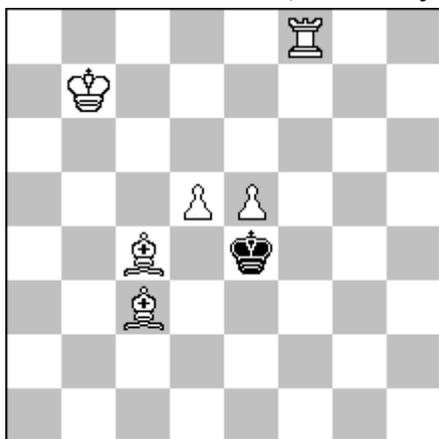

1. b3 Kb5 2.Sd4+ Ka5 3.b4#

b) 1.Kb3 Kb5 2.Sd4+ Ka5 3.Bc3#

c) 1.Sb4 Kb5 2.Rc2 Ka5(a5) 3.Rc5#

Threefold switchback of the black king, combined with nice and easy play by white. Simple but charming!

### 2<sup>nd</sup> HM: Dieter Müller, Germany

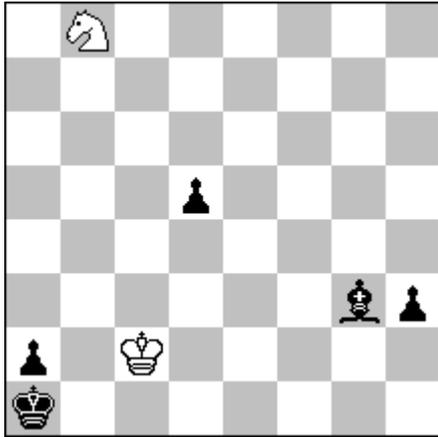

#3 b) wSe5 c) wBe5

1. e6 Ke3 2. e7 Ke4 3.e8Q/R#  
 b) 1.Kc6 Ke3 2.Rf3 Ke4 3.Bd3#  
 c) 1.Rf2 Ke3 2.Bcd4 Ke4 3.Rf4#

Another threefold switchback by the black king. Weaknesses are the simple first solution and the promoted bishop in c), but still a nice triplet, with three quite different settings, and nice, subtle play by white in b) and c).

**3<sup>rd</sup> HM: Valentyn Hupchenko, Ukraine**

#3 b) wRb8 c) wBb8

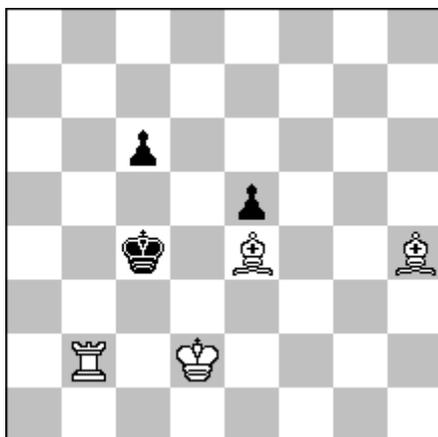

- 1.Sc6 Bf2/Be1 2. Sa5/Sd4 – 3. Sb3 b) 1. Rf8 (2. Rf1+ Be1 3. Rxe1)  
 1... Bf2/Bf4 2. RxB – 3. Rf1  
 c) 1.Bxg3 d4 2. Be5 h2 3. Bxd4

Another minimal triplet. A good achievement, but unfortunately, the variants are quite simple, and the brutal key in c) is a major weakness. It could be fixed quite easily though, e.g. like this:  
 Kc2 Sb8 - Ka1 Bh4 Pf6 Pa2 Pg4 #3 b) wRb8 c) Bb8

- a) 1. Sc6 b) 1. Rd8 c) 1. Ba7

Unless any objections are raised, I suggest that this version of the problem replaces the original version in the tourney, and that it remains at the 3<sup>rd</sup> HM.

**1<sup>st</sup> Comm: Eligiusz Zimmer/Mykola Chernyavskyj,  
 Poland/Ukraine**

#3 b) wRh4

1. Bd8!

1. ... Kc5 2. Rh6 Kc4 3. Rxc6#

1. ... Kc3 2. Rhh2 Kc4 3. Rhc2#

My favorite among the problems with only two settings. Good harmony between the twins, and several nice and different variants and mates.

## 2<sup>nd</sup> Comm: Myron Gnatyna, Ukraine

#3 b) bSb8

1.Rb1!

1...Ba7 2.Rb5 -/Bb6 3. Ra5/Rxb6

1...Bc7 2.Rb7 -/Bb6 3. Ra7/Rxb6

1. Rc5? Bc7!

b)1.Rc5! Sxc6 2.Rb5 S~ 3. Rb6

1. Rb1? Sd7!

One of very few problems using black piece exchange. Two very well-balanced variants, where the solution in one variant becomes a good try in the other one.

Finally, I would like to give my greatest thanks to all participants for all their fine entries, and last but not least to Mykola Chernyavskij, for letting me judge this tourney. Big thanks to everybody, and congratulations to the winners!

### Preisbericht zum 4.TT PU

Aufgaben und Autoren: 1, 7, 9, 25, 26, 65 - M. Gershinski, 2, 3, 17, 53-55 - I. Lind, 4 - M. Garcia & C.Grassano, 6, 49-52 - N. Zujev, 5, 10, 61-64 - M. Gnatyna, 11, 16 - C. Grassano & M. Garcia, 12 -15, 47 - A. Dashkovskij, 18-21 - V. Klipatshev, 22 - L. Makaronez, 23-24 -M. Garcia, 27,

28, 29, 30 - O Mihalco, 31-44, 66, 67 - M. Degenkolbe, 45, 46 - V. Kryzhanivskyy, 48 - A. Dashkovskij & V. Kryzhanivskyy, 56 - O. Zhuk, 57-58 - M.Svitek, 59, 60 -V.Smirnov.

Von den 67 zu diesem Themturnier eingereichten Aufgaben waren leider 13 unthematisch (kein Idealpatt für den schwarzen König in der Diagramm-Stellung). Zusätzlich gabe es zu einer thematischen Aufgabe drei unthematische Versionen. Eine Aufgabe war nebenlösig und zwei andere besaßen Duale. Ein Neunsteiner mußte ebenso ausgesondert werden (keine Miniatur) wie ein Zehnzüger (Themabeschränkung waren 8 Züge) oder eine Aufgabe mit drei weißen Springern.

## Abteilung 4- und 5-Steiner

In dieser Abteilung gab es drei Aufgaben, die in identischer Ausformung oder ähnlich (aber vom Inhalt her gleich) eingereicht worden sind:  $06 = 22$ ,  $13 = 61 = 64$  und auch  $17 = 54$ .

Leider gab es erwartungsgemäß auch Aufgaben, die einer Vorgängerprüfung nicht standhalten konnten, obwohl sie für den Bericht vorgesehen waren:

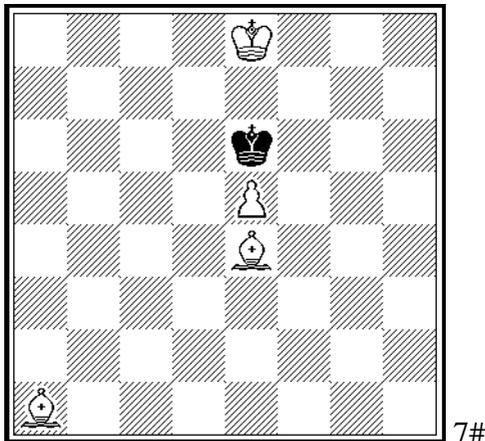

26 (d7/d5) siehe PDB P1125511 (N.Sinowjew, IMR 72, 10/1998)

17 = 54 (a3/c2) siehe PDB P1155235 (M.W.Matrjonin, Schachmatnaja Kompos. 35, 05/2000)

Begutachtet wurden 23 Aufgaben.

Mit 4 oder 5 Steinen läßt sich erwartungsgemäß nur ein ganz beschränkter Inhalt realisieren. Ausgerüstet mit diesen Informationen ergibt sich folgender Preisbericht:
