Año 2012 - PARTE VIII

ESTUDIOS ARTISTICOS DE AJEDREZ – OBSERVADOS

CORRECCIONES –RECREACIONES: PROPUESTAS Y ENSAYOS

PARTE VIII

Mario Guido García

INTRODUCTION

Corrections are proposed -, subject to verification and acceptance from the technical point.

- The studies selection corrected were not made attending to the artistic quality of these, but simply for the purpose of achieving the compliance of the consigns in a reasonably univocal manner.

As you can see, the vast majority of the proposals should be included in the category of "corrections" because the thematic idea and sequences from the composers has been maintained. That is, in many cases, it's possible to make an "improvement", but this would mean the realization of a "recreation" or the presentation of a "new version" of the study.

Surely, there will be records of other corrections proposals for studies presented in this section made by other analysts, composers, or by the same author which I have not detected. Also, there is a reasonable possibility of error on the proposals set out here. So I programmed the presentation of an annex that includes among others, the following items: a) new proposals for corrections; b) annulments; c) proposals for recreation or new versions, etc.

In this report are included studies "observed" ("Does not meet the slogan" - "major dual"-another solution), that are not contained in the database made by Harold van der Heijden. -

It's shown studies that match with the "observations" listed in the databases mentioned

The numbering (No.) specified in each study "observed", corresponds to the databases H. H.

Important: a) This report arises from the systematic analyses initiated in 1994 from studies published in different books and were completed in year 2005 with the information in the databases H.H.III and H.H.IV and later with the added in version H.H.V; b) The proposals developed here are mostly similar to those shown at the bottom of the studies observed contained in reports sent to multiple analysts, composers, to Dr. Harold van der Heijden to the effects to be considered in their databases and for publications in Spotlight section from EG. Magazine..

INTRODUCCION

- Se proponen correcciones (arreglos)- , sujetos a verificación y aceptación desde el punto de técnico .-

- La selección de estudios corregidos no se ha realizado atendiendo a la calidad artística de éstos, sino simplemente a los efectos de lograr el cumplimiento de las consignas y de una forma, razonablemente univoca

- Como se notará, a la gran mayoría de las propuestas se las deberían incluir en la categoría de “correcciones”, ya que se ha mantenido la idea temática y las secuencias planeadas por los autores. Es decir, en muchos casos es posible tal vez, realizar una “mejora”, pero esto implicaría la concreción de una “recreación” o la presentación de una “nueva versión” del estudio.

- Seguramente, existirán registros de otras propuestas de correcciones a los estudios que se presentan en esta sección elaboradas por otros analistas, compositores, o por el mismo autor, y que no he detectado. Así también, existe una razonable posibilidad de error en las propuestas acá expuestas, por lo que he previsto la adición de una separata que incluya entre otros, los siguientes puntos: a) nuevas propuestas de correcciones; b) anulaciones; c) propuestas de recreaciones o nuevas versiones, etc.

- Se incluyen en el informe estudios “observados” (“No cumple la consigna”- “dual de importancia” -otra solución) que no están contenidos en la bases de datos de finales confeccionadas por Harold van der Heijden.-

- Se desarrollan los estudios que coinciden con “observaciones” también indicadas en las bases de datos de finales mencionadas.-

- Se informa sobre algunas versiones de estudios que tienen como objetivo la corrección de errores.-

- La numeración (Nº) que se indica en cada estudio “observado”, corresponde al de las bases de datos de H. H.

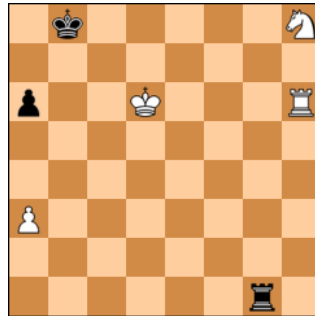

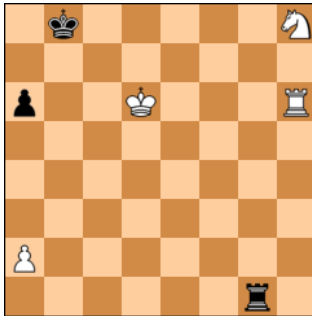

Importante: a) Este informe surge de los análisis sistemáticos iniciados en el año 1994 de los estudios contenidos en diferentes libros y complementados a partir del año 2005 con la información registrada en las bases de datos HH.III y HH.IV y posteriormente con los agregados en la versión HHV; b) Las propuestas acá desarrolladas son en su mayoría similares a las indicadas al pie de los estudios observados contenidos en múltiples informes enviados a analistas, compositores, al Dr. Harold van der Heijden a los efectos de ser considerados en sus bases de datos y a los destinados a las publicaciones en la Sección “Fe de Erratas”(Spotlight) de la revista EG.
